Dear Colleagues

We are please to pass on news of acceptance for publication of our analysis of the prior work of Rauh et al. (2011) regarding chlorpyrifos. We were unable to get a response from Professor Rauh for access to the

underlying data, suitably redacted, for this, in part, publicly funded research, despite repeated attempts. Nor were the journal editors able to get a written response from Professor Rauh to our manuscript as indicated in the email below this note.

We would be happy to give a briefing on this work.

Sincerely,

<PastedGraphic-6.pdf>

Title: A Commentary on Some Epidemiology Data for Chlorpyrifos

Corresponding Author: Dr. Michael Dourson

Authors: Bernard Gadagbui; Chiijoke Onyema; Patricia M McGinnis

Dear Dr. Dourson,

Congratulations. I am pleased to inform you that your manuscript, referenced above, has been accepted for publication in Regulatory Toxicology and Pharmacology.

In addition, I have added a postscript to this commentary stating:

"The editors-in-chief have repeatedly asked the corresponding author of the publication by Rauh et al (2011) to comment on this commentary to achieve maximal scientific transparency about this issue for the readers of Regulatory Toxicology and Pharmacology. However, to date we have not received any comment or rebuttal on this commentary by M. Dourson."

Many thanks for this paper. We look forward to the submission of your future manuscripts to Regulatory Toxicology and Pharmacology.

Your accepted manuscript will now be transferred to our production department and work will begin on creation of the proof. If we need any additional information to create the proof, we will let you know. If not, you will be contacted again in the next few days with a request to approve the proof and to complete a number of online forms that are required for publication.

With kind regards,

Martin van den Berg, Ph.D.
